The device offers a total power output of 405 watts.

SAFETY

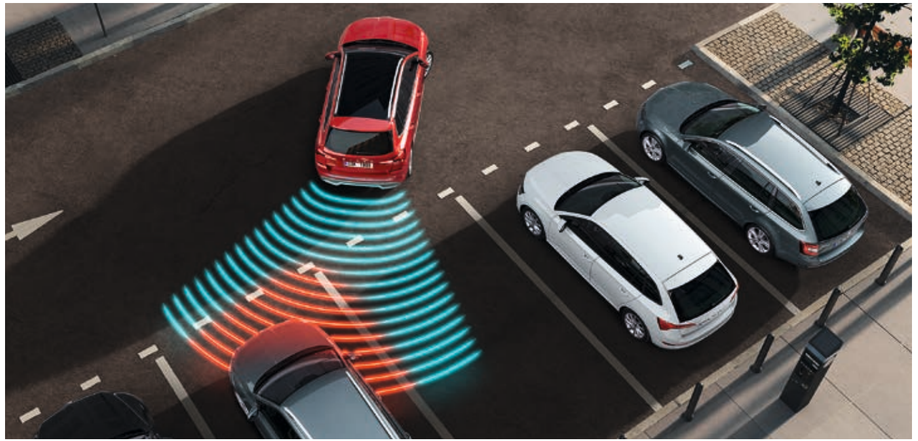
WE'LL WATCH YOUR BACK

Embark on any adventure with complete confidence. The KAMIQ comes with plenty of assistants supporting your driving skills on the road, helping you with parking and even preventing collisions.

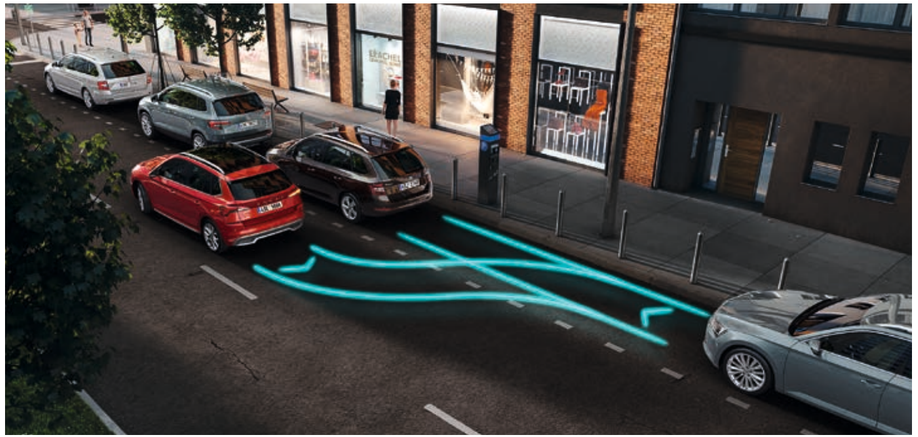
SIDE ASSIST
Using radar sensors in the rear bumper, Side Assist which can detect other vehicles and even less detectable objects like cyclists up to 70 m away, monitors the areas behind and beside your car. Based on the distance and speed of the surrounding vehicles, it decides whether or not it should warn the driver.

REAR TRAFFIC ALERT
This assistant, which comes as part of the Side Assist system, helps you reverse safely from a parking space during poor visibility. It can even engage the brakes automatically if it detects imminent danger.

MANOEUVRE ASSIST
Using the sensors of the Park Assist, this system offers protection from obstacles within driving distance of the car (at speeds of up to 8 km/h). If an obstacle is detected, based on the distance from the obstacle and the car's speed, the system engages the emergency braking.



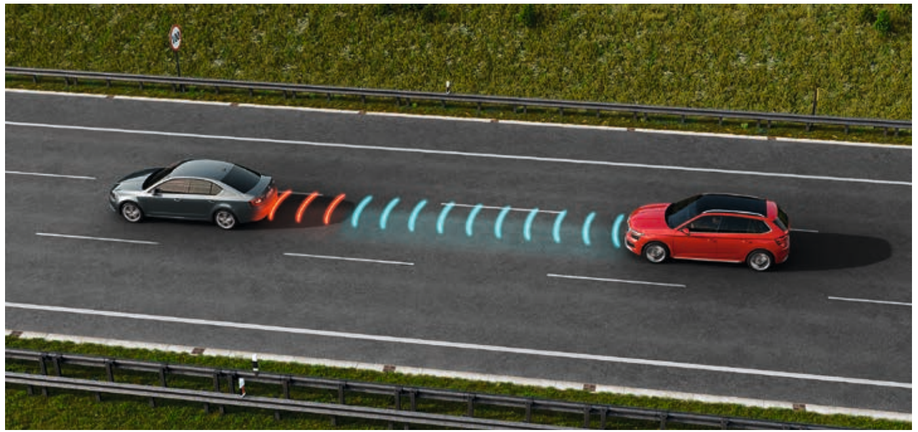
PARK DISTANCE CONTROL
Parking the KAMIQ is easier and safer with the parking sensors integrated in the front and rear bumper, which check the car's distance from any obstacles.



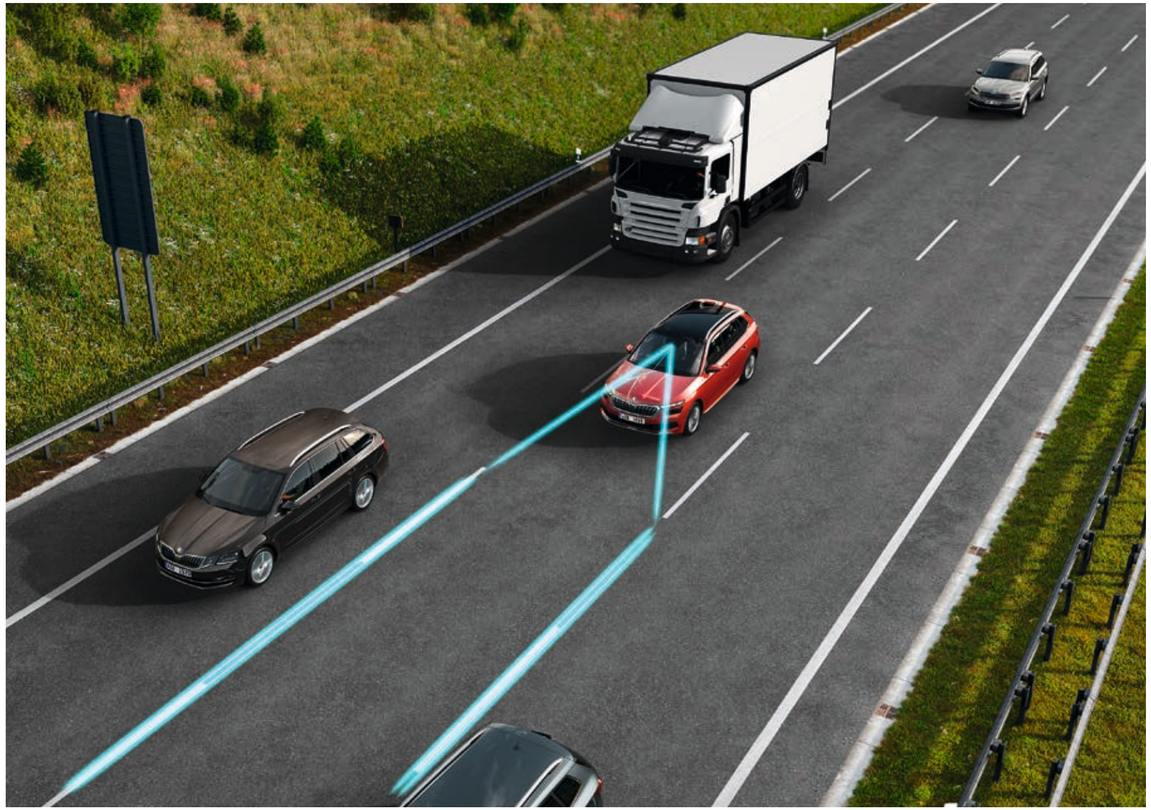
PARK ASSIST
Minimise the hassle of parking in tight spots with Park Assist. It automatically selects an appropriate parking spot in a row of parallel or perpendicularly parked vehicles.

FRONT ASSIST WITH PREDICTIVE PEDESTRIAN PROTECTION
The Front Assist system, using a radar device in the front grille, is designed to monitor the distance from the vehicle ahead, including emergency braking function. The KAMIQ comes with Front Assist expanded with predictive pedestrian protection, which warns the driver via an audio/visual signal as well as a gentle jolt of the brakes.

AUTO LIGHT ASSIST
Your Light Assist will switch to high beam and back automatically, increasing comfort and safety in traffic.



ADAPTIVE CRUISE CONTROL
Using a radar device in the front grille, in addition to its basic cruise control function, this assistant system, which operates up to speeds of 210 km/h, maintains a safe distance from vehicles in front of you.



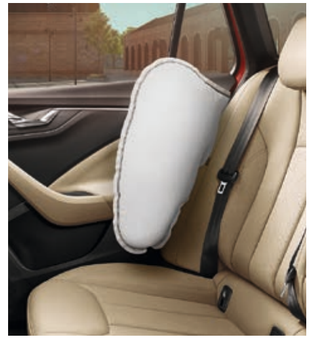
LANE ASSIST
Operating at speeds above 65 km/h, this system can help to keep the car in the correct lane.

SAFETY FIRST, SAFETY LAST

In extreme situations, where the driver cannot actively influence the outcome, the car's passive safety elements take over – like the airbags. You can have your car equipped with up to nine of them.

FRONT AIRBAGS
While the driver airbag is enclosed in the steering wheel, the passenger airbag is located in the dashboard. If needed, this can be deactivated when a child seat is installed on the front seat.

HEAD AIRBAGS
Upon activation, head airbags create a wall protecting the front and rear occupants against head injury.



FRONT AND REAR SIDE AIRBAGS
These four airbags protect the pelvis and chest of the driver and other passengers in the event of a side collision.

KNEE AIRBAG
This airbag, which is located under the steering wheel column, protects the driver's knees and shins.

PERFORMANCE

G-TEC

LOW ON EMISSION, HIGH ON AMBITION

If you're looking for an economical and green alternative to conventional fuels, look here. The ŠKODA KAMIQ G-TEC driven by compressed natural gas offers the user-friendliness of internal combustion engines combined with lower emissions. Enjoy your drive to the fullest and fill your tank to half.

CNG AND PETROL SWITCHING
Switching between the two fuel systems is automatic. The engine is started using CNG and then continues in CNG mode. Should the CNG run out, the car will automatically switch to petrol mode.

ENGINE AND TANKS
The car comes with an agile three-cylinder 1.0 TGI/66 kW G-TEC engine. In CNG mode (compared to running on petrol), CO_2 emissions are reduced. The car's environmental friendliness is also declared by lower emissions of nitrogen oxides (NO_x) and no solid particles. Three steel CNG tanks can carry 13.8 kg of fuel, which enables you to cover around 410 km. Combined with the nine-litre petrol tank, this makes for a total range of around 630 km.
